

Our new customer account feature is now live! It conveniently ties your Media Supply account to your existing Yahoo!, Google or AOL login info, so you won't have a separate user name and password to remember. You can see your current order status, review your order history to easily reorder, and save your billing and shipping address information, so you won't have to reenter it for each order. You also have the option of securely saving your credit or debit card information.

If you aren't interested in creating an account, that's no problem, it is not required, just select "Use Guest Checkout" when prompted. Also, our old customer account manager is still active, but it has less features than the new system. Some customers experienced problems using it, which is why we moved to the new system. You can still use the old system, but we strongly recommend registering for a new account.

Here are the instructions for accessing and using the old customer account manager:

1. Go to <https://services.mediasupply.com/ssl/sclogin/login.php> and sign in.
2. Shop and add items to your cart as you usually would.

3. When after you hit the "Proceed to Checkout" button, you will be taken to this page:
4. Select "Use Guest Checkout"
5. You will proceed to the checkout page, and your stored information should appear in the shipping and billing address fields.
