

# Verbatim Blu-Ray LTH Type Media

## Verbatim BD-R LTH Type Technology

Verbatim BD-R LTH media is manufactured with an organic dye that turns the disc's reflectivity during recording from "low to high". Other BD-R discs use the "high to low" recording method. Additionally, BD-R LTH is manufactured on converted CD-R/DVD-R production lines, which utilize a spin coating process and allow excess materials to be recycled. These two cost-cutting measures let us pass along the savings to you. Upon introduction of the BD-R LTH media, key hardware manufacturers like Sony, Pioneer, Panasonic and LG have worked to assure that their burners are fully compatible.

BD-R LTH Type Write compatibility				
BD Writers				Verbatim Media
Maker	Model	Size	Write Speed	BD-R LTH Type 2x SL
				96569(1pk), 97090(20pk)
Buffalo	BRHC-6316U2	H/H	6x	NO

\*Disc recorded with BD-MV format was confirmed. Information provided from MKM internal testing. New firmware versions may have been released since test results posted.

Note: Not guaranteed over write speed. Some OEM drives/PC may have the same model #, but writing speed depends on firmware. And if the writer type is the same, indicated writing speed sometimes depends on models and regions. Information provided from MKM internal testing. New firmware versions may have been released since test results posted.
