

Archival Gold DVD-R

Archival Gold DVD-R integrates a double reflective layer of both Gold and Silver to ensure highest compatibility. The 24K gold layer offers maximum resistance to environmental degradation. Especially corrosion which is one of the major causes of discs failure in standard media. While the silver layer delivers high reflectivity and broad drive compatibility.

Archival Gold DVD-R has been tested in accelerated ageing tests under severe storage conditions: high temperature and high humidity. The results confirm a safe storage of information for more than 100 years.

Archival Gold DVD-R features 8X speed, ideal to ensure best recording performance. Archival Gold DVD-R is also available with Ultra Hard Coat UHC™ for safe handling. UHC™ secures the content by providing 100 times more scratch protection when compared to conventional DVDs.

Speed **Capacity** **Recording Time**
1-8x **4.7GB** **120min**

- 24K Gold layered disc
- Archival Grade
- Premium OEM Japanese materials & technology
- Licensed Japanese media code
- Excellent compatibility
- High performance with low error rates

Specification	Ver 2.1
Recording speed	1-8x
Storage capacity	4.7GB
Recording time	120Min Video SP mode
Layer	Single
Recording type	Write-Once
Recording layer	AZO
