

GENESIS

The worlds most powerful USB duplicator!

Genesis Flash XL2800 28 Port Control Center

The Genesis Flash USB Duplicators offer incredible functionality and expandability that has never been seen in the industry. The powerful MasterUSB Command Center software provides the fastest and most reliable USB duplication available. These systems come complete with all you need to begin copying USB drives, includes custom software specially engineered to the USB duplication hardware.

The XL700 can duplicate up to 7 USB drives at a time, the XL2800 can duplicate up to 28 USB drives at a time. Both control centers have the option of combining with Add-on towers to increase the number of USB ports. Two types of Add-on towers currently available add 21 or 49 USB ports, increasing your duplication capacity up to 77!

Command Centers Feature:

- USB Duplication made easy with this complete Turn-Key system
- Expand your productivity up to 77 drives at a time with optional Add-On towers
- Fast and easy to use MasterUSB Command Center software
- Multipurpose drives and card slots to copy different master types
- Ready out of the box -- no hardware to buy, no software to install
- System includes the Keyboard, Mouse and Monitor

Genesis Flash XL700 7 port Command Center

This command center has a compact size featuring the same power and expandability as it's big brother XL2800.

MasterUSB

COMMAND CENTER

The included MasterUSB software ensures that managing and copying your USB drives is a simple and easy task. Save and organize your data on the internal hard drive for future use. Choose from multiple input sources such as USB, SecureDigital (SD), CompactFlash (CF), Smart Media (SM), Memory Stick(MS) or copy from the internal hard drive!

Software Features:

- The only scalable USB duplication system available – expand from 7 ports to 56, from 28 ports to 77!
- Flash Drive management with hard drive image storage for quick retrieval
- Use any media for source master, including CD / DVD data, flash cards, USB drives, and more
- Automatically correct USB drive partition errors with advanced repair utility
- Super fast system, mounts drives and duplicates in the time it takes other systems just to mount the drives!
- Color coded status key for easy feedback
- Simple easy to use graphical interface
