

Product Brief | Rimage Disc Authoring Wizard

An end-to-end professional solution

Rimage Disc Authoring is a powerful end-to-end solution that brings your disc production in-house. Author high-quality DVDs using photo, video and audio with zero dependency on third party vendors.

With one integrated system, you author discs, record content, create case wraps and print photo-realistic images directly to the disc with Rimage's thermal print technology, giving customers a stunning deliverable and smartly marketing your business—all while improving productivity and your bottom line.

Benefits

Workflow automation

Integrates seamlessly with Rimage disc publishing platforms. Automate disc production and improve workflow without sacrificing quality.

Easy to use

With the wizard-based interface, create professional DVDs in three simple steps: load, design and produce. Manage in-house production without overcoming a steep learning curve or outsourcing.

Unique customization

The software includes a wide selection of customizable templates and fields for disc content and packaging. Offer a variety of eye-catching products tailored to specific customer requirements.
