

USB DRIVES

MEDIA SUPPLY®

611 Jeffers Circle Exton, PA 19341 | 1-800-944-4237

Promotional uses for USB flash drives

Pharmaceutical Companies

Despite the recent ban of promo products to health-care professionals USB flash drives are still going strong. USB flash drives meet the PhRMA industry code for educational items when pre-loaded with video tutorials, drug fact documents and/or case studies.

Sports and Recreation

Get the word out and promote the upcoming season by distributing press info, last seasons highlights and the new season schedule via USB flash drive. And for all those fantasy sports gurus, keep track of your players stats stay on top of the game.

University and Educational Institutions

From recruitment to alumni status, the USB flash drive is fast becoming the medium in which to distribute information. Ideas? Here are a few:

- *Recruitment and Admissions*
- *Promotion of Student Organizations and Events*
- *Donor and Alumni Gifts*
- *Faculty and Student Handbooks*
- *Lectures and Presentations*

Financial Institutions

Make it easy for new customers to switch over to online banking. Auto-run the login page of the website for quick, easy access. With the remaining storage space on the drive, customers can download bank statements and save receipts or other documents.

Healthcare Industry

USB drives are being used by medical professionals and patients alike. Holding everything from health and contact info to medications and allergies, the USB flash drive has replaced medical alert bracelets in function and utility.

Awards and Recognition

Need to honor a top sales person, promote employee loyalty or just want to show them a little appreciation? Why not give USB flash drives. They can be pre-loaded with photos of the company party, online gift certificates or discounts. And for all of the bosses out there, your employees can now transfer and work on files efficiently from home to office.

Why data pre-load? It's the new medium for content delivery.

USB drives, also known as Thumb Drives, Flash Drives, or Memory Sticks, are a serious upgrade from floppy disks, CD's and other digital storage mediums. USB drives allow you to plug the drive into your computer's USB port and transfer, store and share all of your pictures, videos, music and data, in no time at all.

**in-stock models only.*

Data pre-loading is the new medium for content delivery. Data pre-loading is a simple process of pre-loading or copying files on to a USB flash drive. Clients use pre-loaded drives to distribute all sorts of files to customers, employees, students, etc. By distributing your files on a USB drive you save on the cost of printing and shipping as well as helping the environment. You can preload any file type and as many different files as you want. Anything from PDF brochures and catalogs to movie clips and presentations.

What can you do with your USB drive?

Catalogs and multi-page documents

Catalogs are costly to produce, hard to ship and can take up valuable disk and storage space. Hand out your catalogs on a USB flash drive and you've saved time, labor and the environment. This catalog is a little over 2MB... you can put over 300 of these on a 1GB flash drive!

Photo Albums & Digital Artwork

High-resolution digital images are roughly 2MB in size, so think... on a 2GB drive you could hold up to 1,000 digital photos. The average photo album holds 200 photos, that's 5 full photo albums on one little drive.

PowerPoint Presentations & Slide shows

An average 10 slide PowerPoint presentation is less than 1MB in size (330kb) which means you could fit over 2,000 of them on a 1GB USB drive. Be prepared for anything with a library of useful presentation materials and slide shows.

Text-only Electronic Documents

When used to store text-only electronic documents, a 1GB USB flash drive can store thousands of files with a single data-load. And remember, USB flash memory is reusable. Copy, delete and repeat.

Video Demos & Flash Animations

The average 2 minute video on YouTube is approximately 4MB. With a 1GB USB flash drive you could hold over 250 of these videos... that's over 8 hours of video content.

Textbooks & Encyclopedias

Imagine having all of your textbooks and a full set of encyclopedias with you all the time. With a USB flash drive you can have them all on one little drive. Access it from school, work or at home. Knowledge at your fingertips.

Standard price USB flash drives

USB flash drive upgraded packaging

ARCTIC

Available in a variety of colors, the Arctic is a great way to dress up your next promotion or corporate gift. Features a faux velvet finish and drawstring closure.

DIMENSIONS: 4 x 0.15 x 3"

CARIBBEAN

The impressive and sleek Caribbean is made from durable aluminum. The clear window highlights your USB drive and the inner foam lining keeps the drive well protected.

DIMENSIONS: 4.6 x 3.4 x 0.9"

ATLANTIC

When you want to leave an environmentally friendly impression, choose our 100% recycled 1pc. box. With a classic pinstripe accent on the exterior it's sure to impress.

DIMENSIONS: 3 x 3 x 2"

CASPIAN

The Caspian is a faux-leather sleeve designed for the Quincy USB but can fit anything from a credit card, license or membership card.

DIMENSIONS: 4 x 0.1 x 2.6"

BALTIC

Made from aluminum, the Baltic features a clear window that displays the imprinted drive inside and a foam lining to keep the drive safe during transport.

DIMENSIONS: 3.75 x 2.3"

CONGO

Prescribe anything you want with our new Congo prescription bottle packaging. It adds flare and boosts retention for your clients next project. Think outside the box... to the prescription bottle.

DIMENSIONS: 3.3 x 1.25 x 1.25"

USB flash drive upgraded packaging

FLASH CARD - 4x6

The 4x6" Flash Card is a great upgrade to your give-away. Attach a lightweight, pre-loaded Langley to the card for an additional marketing opportunity.

DIMENSIONS: 4 x 6"

MALTA

The Malta is another great option for eco-friendly packaging. With an open-weave, this burlap pouch features a simple drawstring closure.

DIMENSIONS: 5 x 3"

FLASH CARD - 5.5x4.25

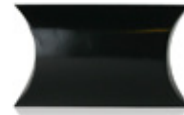

The 5.5x4.25" folded Flash Card is a great promo piece for our Langley USB model. With it's slim, lightweight design, it easily fits in the card without adding bulk or additional postage costs.

DIMENSIONS: 5.5 x 4.25" - Folded

MEDITERRANEAN

The pillow box is a fun way to spice up your next promotion. When the side flaps are tucked in they create a pillow effect that leaves room inside for accessories or inserts.

DIMENSIONS: 4 x 3.75 x 1.5"

HUDSON

The Hudson is the perfect gift box packaging. With a soft foam lining and silver bow, the Hudson dresses up any gift or promotion.

DIMENSIONS: 8.3 x 2.2 x 1"

NILE

Think of your USB drive as a precious gem and package it in a jewelry box. With a soft foam lining your USB will be cradled inside.

DIMENSIONS: 3.5 x 3.5 x 1"

USB flash drive upgraded packaging

PACIFIC

Our popular magnetic case is simple yet effective. With a transparent body you can see the drive and logo inside even when the case is closed.

DIMENSIONS: 3.7 x 1.75 x 0.9"

YUKON

Treat your USB drive promotion like gold and dress it up with the Yukon gold bar packaging. Featuring a mirrored gold foil finish, it's sure to turn heads.

DIMENSIONS: 3.15 x 1.7 x 0.75"

THAMES

The classic Thames packaging is a simple slide-box, much like the old fashioned match boxes. It's simple exterior can be pad printed with your logo or company information.

DIMENSIONS: 3 x 1.9 x 0.85"

CUSTOM INSERT

Upgrade to a custom insert card. Include all of the pertinent information, logo, or instructions to extend the impact of your brand and promotion.

DIMENSIONS:

2.25 x 3.5" (Standard packaging only)

**Please inquire for additional sizes for our upgraded packaging options.*

TASMAN

Not your typical packaging. When you want to make an impression that will last go for the Tasman. This mini take-out box will add flare to your next promotion.

DIMENSIONS: 3 x 2.125 x 3.5"

Additional customizations

KEYRING

Our keyrings are made from a sturdy, heavy-grade metal designed to withstand everyday wear and tear. The nylon loop makes it easy to attach but doesn't add extra bulk or weight.

DIMENSIONS:

Ring - 1.1" diameter | Nylon loop - 1.9"

LANYARDS

Our durable nylon lanyards are available in red, blue, white and black. For maximum branding add a 1 color imprint that repeats across the length of the neck strap. 50 piece min. order quantity.

DIMENSIONS: 17 x 0.4 x 0.12"

IMPRINT AREA: 1.75 x 0.3"

Standard preload: You can preload any file type and as many different files as you want. The most common pre-loads are PDF brochures or catalogs, movie clips (commercials or training videos), PowerPoint presentations, and Word documents. There is no limit to what files you can load onto a USB drive.

Data-lock: Data-locking refers to 'locking' files so that the end user is unable to delete them. Data-locking requires the drive to be partitioned into two parts. One part can be used like a normal flash drive: files can be loaded, opened and deleted as usual. The second part of the drive shows up on the computer as a CD-Rom drive and contains the locked data which cannot be deleted or edited. MAC users cannot view the locked portion of the drive.

Auto-run: An auto-run is coding that automatically runs a specified file that is preloaded onto the drive. By auto-running a specific file you can ensure that the end-user is directed to pertinent information each time they plug in the USB flash drive. Please note that auto-runs will not work on MACs and some PCs with very high security settings. Auto-runs can also be deleted by the end user.

Password lock: Password locking USB flash drives refers to 'locking' the entire drive so that you or the end-user can set your own password. By adding a password lock you can ensure that the data falls into the appropriate hands and cannot be accessed by un-authorized users. Please note, password locks will not work on MAC computers.

Website auto-run: A website auto-run is coding that automatically runs any URL that is preloaded onto the drive. By auto-running a specific URL you can ensure that the end-user is directed to your website each time they plug in the drive. Please note that auto-runs will not work on MACs and some PCs with very high security settings. Auto-runs can also be deleted by the end-user.

Environmentally friendly

Being **environmentally** responsible should be the guideline of every company in today's fragile global society. That is why we have taken the initiative and made all of our USB flash drives **eco-friendly**. **Eco-friendly** flash drives are better for the environment because the materials used, such as lead-free solders are more easily decomposed than their traditional counterparts and are less harmful to the environment. Advances in technology and materials have allowed us to produce **eco-friendly** drives with the same quality and price points as before.

The following are the **eco-friendly** components of our products:

- *USB drive including the PCB board, solder, memory chip and electronic components*
- *Housing or casing including those made of plastic, aluminum, steel, leather-ette and silicone.*

Environmentally friendly USB drives follow the guidelines of the EU RoHS Directive. The RoHS Directive stands for "the restriction of the use of certain hazardous substances in electrical and electronic equipment". This Directive bans the use of new electrical and electronic equipment containing more than the agreed levels of Lead, Cadmium, Mercury, Hexavalent Chromium, Polybrominated Biphenyl (PBB) and Polybrominated Diphenyl Ether (PBDE) flame retardants.

Our USB flash drives are not only built **eco-friendly** but the use of them saves thousands of trees. Where we once would have printed a catalog or volumes of information to take back and forth to the office, home or school, we can now transfer and distribute all of it on a reusable flash drive. A 1GB drive can hold 1,000s of text-only documents, reducing paperwork clutter and saving valuable time and money. That same drive can save roughly 50 trees with a single data-load when used to store text-only documents.
